

The full-featured Internet browsing experience you've been waiting for.

SnappySeeker is a practical utility that helps **quickly launch various Internet searches** using mobile friendly sites such as Google, Yahoo!Finance, Amazon, Wikipedia and much more.

SnappySeeker is **very convenient and time-saving** for users who love to search the web on their Blackberry phone. It has an intuitive, space efficient and elegantly designed interface, packed with enough power to search 12 different categories.

» Why Not Use the Built-In Browser?

Assuming popular websites such as Google, Yahoo!Finance, Amazon, Wikipedia, etc. are in your Favorites list, it **takes up to 3 selections** after the browser is open **to perform a simple Web search**.

Even more selections are required to use any of the other search types such as maps, images, groups, news, shop, and software.

SnappySeeker harnesses all this search power into just one press of a button. And, with such a user-friendly interface, you'll love how easy it is to navigate and categorize searches.

» [How to Use SnappySeeker](#)

With SnappySeeker, choose to **search the Web, Mobile sites, Images, Shop, News, Stocks, Maps, Gmail, Groups, Software, Books, and Wikipedia** with absolute ease.

To launch a search, type a query in the text box and choose an appropriate thumb-sized category button. The search results will open through the default web browser.

After viewing search results, press the escape button to return to the main SnappySeeker screen.

SnappySeeker is an elegant and useful solution aimed to enhance the productivity of your searches. Get it now for only \$4.95!
